MAY 30 2000

Mr. James A. Saric
Mr. Tom Schneider

-2-

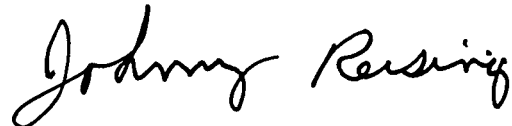

Enclosed for your review is draft Addendum 2 to the Waste Acceptance Criteria (WAC) Attainment Report for Area 7 Soils (Silos Project Area) entitled, "WAC Characterization for Variance/Field Change Notices 20500PSP1-9, 12, 14, and 15." This document summarizes the additional analytical results obtained from the Silos Project area for the purpose of On-Site Disposal Facility (OSDF) WAC attainment in response to the Ohio Environmental Protection Agency (OEPA) Comment 11 (Reference 1). Sampling was documented through the use of Variance/Field Change Notices to the existing approved Area 7 Project Specific Plan (PSP). The analytical results in this addendum include the Area 7, Phase II (A7PII) sampling program that has been previously approved by the Agencies. Additionally, the analytical summary previously transmitted by facsimile from sampling necessary to respond to the OEPA comments concerning the Lime Sludge Ponds Integrated Remedial Design Package (IRDP) (Reference 3), are also included as an appendix.

Upon your concurrence, please forward this document to the Agencies for their review. A draft transmittal letter is enclosed for your use.

Upon Agency approval, Addendum 1 pertaining to the Pilot Plant Drainage Ditch sampling analytical results (Reference 2), and Addendum 2 will be incorporated in the next revision of previously approved WAC Attainment Report for Area 7 Soils (References 4 and 5).

If you have any questions or require additional information, please contact Robert Janke at (513) 648-3124.

Sincerely,

Johnny W. Reising
Fernald Remedial Action
Project Manager

FEMP:R.J. Janke
